PRESS RELEASE

December 2005

Scoliosis creates titanium superheroine from business analyst

By day, she's a mild-mannered business analyst, by night she's the Titanium Maiden - superheroine dedicated to triumphing over evil in the form of serious curvature of the spine known as Scoliosis.

Author Kremena's fight against Scoliosis evil is detailed in a new novel from Smink Works Books entitled *Sex, Scars and a Superheroine with Scoliosis*.

Under the superheroine disguise of business analyst, Kremena wrote most of the quirky semi-autobiographical book on Post-It notes in an office toilet cubicle.

But this superheroine's weapon of choice? Life philosophy. The novel is peppered with more than 200 of Kremena's own quotes about life. "I silently asked myself pseudo-philosophical questions about my life and everyone else's," she says.

Indeed, the Titanium Maiden has gathered valuable lessons and become a stronger person by fighting Scoliosis - but she's not about to admit that out loud. After all, it might sound schmaltzy.
